ABSTRACTS

735 Eleventh annual meeting of the Canadian Radiation Protection Association

869 25th annual meeting of the Japan Health Physics Society

ACCELERATORS

209 Thermalization of accelerator-produced neutrons in a concrete room

587 Depth distribution of residual radioactivities in the concrete wall of an electron linac facility

763 Computerized system for nuclear emergency response in the ENEA nuclear research center of Frascati

ACCIDENTS, RADIATION

1 The Goiânia radiation accident

3 Personal insights into the Goiânia radiation accident

5 The Goiânia accident: behind the scenes

7 The radiological accident in Goiânia: the initial remedial actions

17 Medical and related aspects of the Goiânia accident: an overview

25 Localized lesions induced by ^{137}Cs during the Goiânia accident

31 Clinical and hematological aspects of ^{137}Cs: the Goiânia radiation accident

41 Measurements of ^{137}Cs in blood from individuals exposed during the Goiânia accident

43 Application of in-vitro bioassay for ^{137}Cs during the emergency phase of the Goiânia accident

51 Design and operation of a whole-body monitoring system for the Goiânia radiation accident

57 Studies of Cs retention in the human body related to body parameters and Prussian Blue administration

63 Medical aspects of ^{137}Cs decorporation: the Goiânia radiological accident

67 The fate of chromosomal aberrations in ^{137}Cs-exposed individuals in the Goiânia radiation accident

ACCIDENTS, RADIATION (CONT.)
71 Novel biodosimetry methods applied to victims of the Goiânia accident

77 Guidance for selecting nuclear instrumentation derived from experience in the Goiânia accident

81 Radiological survey of Goiânia by a mobile monitoring unit

87 Considerations related to the decontamination of houses in Goiânia: limitations and implications

91 Distribution of ^{137}Cs in soils due to the Goiânia accident and decisions for remedial action during the recovery phase

99 Cesium-137 in the Goiânia waterways during and after the radiological accident

427 Chernobyl fallout in southern and central Finland

610 Coping with radiation accidents: hospital and community planning

ACCIDENTS, NUCLEAR
462 Protection of the population in the event of a nuclear accident

ACCIDENTS, POWER REACTOR
517 Radioiodine retention in ovine thyroids in northwestern Greece following the reactor accident at Chernobyl

ACTINIUM-227
719 Radiological significance of ^{227}Ac and ^{231}Pa

ADSORPTION
177 An improved ^{222}Rn canister using a two-stage charcoal system

AIR SAMPLING
497 Comparative performance of short-term diffusion barrier charcoal canisters and long-term α-track monitors for indoor ^{222}Rn measurements

ANALYSIS, COST-BENEFIT
169 Regulatory control of indoor Rn

ARGON-41
209 Thermalization of accelerator-produced neutrons in a concrete room

AS LOW AS REASONABLY ACHIEVABLE
843 Implementation of a source term control program in a mature boiling water reactor

ATMOSPHERIC TESTING
S1 Assessment of techniques to determine previous radiation exposures (emphasizing exposures occurring decades earlier): introduction and summary

S3 Current status of cytogenetic procedures to detect and quantify previous exposures to radiation: a summary

S7 Current status of whole-body counting as a means to detect and quantify previous exposures to radioactive materials

S45 Current status of bioassay procedures to detect and quantify previous exposures to radioactive materials

S103 Current status of biological indicators to detect and quantify previous exposures to radiation

ATOMIC BOMB
439 Significance of neutrons from the atomic bomb at Hiroshima for revised radiation risk estimates

ATOMIC BOMB SURVIVORS
281 Cancer dose-response in A-bomb survivors: erroneous basis of Izatt's 'fairly conclusive evidence' for hormesis

281 Response to 'Supra-linear dose-response in the A-bomb study'

ATTENUATION
587 Depth distribution of residual radioactivities in the concrete wall of an electron linac facility

661 Composite materials for x-ray protection

841 Hot particle self-absorption factor

BIOACCUMULATION FACTOR
533 High radiocesium levels in granite outcrop vegetation and reductions through time

BIOASSAY
43 Application of in-vitro bioassay for ^{137}Cs during the emergency phase of the Goiânia accident

S45 Current status of bioassay procedures to detect and quantify previous exposures to radioactive materials

307 U.S. Transuranium Registry report on the ^{239}Pu distribution in a human body

BIODOSIMETRY
71 Novel biodosimetry methods applied to victims of the Goiânia accident

BIOKINETICS
307 U.S. Transuranium Registry report on the ^{239}Pu distribution in a human body

335 Modified biokinetic model for uranium from analysis of acute exposure to UF_6

481 Comparison of systemic plutonium deposition estimates from urinalysis and autopsy data in five whole-body donors

BIOLOGICAL INDICATORS
S103 Current status of biological indicators to detect and quantify previous exposures to radiation

BLOOD
41 Measurements of ^{137}Cs in blood from individuals exposed during the Goiânia accident

139 Suggested reference values for regional blood volumes in humans

BOOK REVIEWS
287 Clinical neutron dosimetry part I: determination of absorbed dose in a patient treated by external beams of fast neutrons

287 Radiation protection

288 Radiation and radioactivity on earth and beyond

461 Low-level radioactive waste: from cradle to grave

461 Understanding in-flight radiation: a reference manual

462 Protection of the population in the event of a nuclear accident

609 Safety series 102, recommendations for the safe use and regulation of radiation sources in industry, medicine, research and teaching

609 Trashing the planet

610 Biological radiation effects

610 Coping with radiation accidents: hospital and community planning

610 Residual radioactivity and recycling criteria

BOOK REVIEWS (CONT.)
611 Radiation biophysics

734 Compendium of neutron spectra and detector responses for radiation protection purposes

867 Power production: what are the risks?

867 Radiation oncology: radiobiological and physiological perspectives

868 An environmental odyssey

868 Biochemistry of ionizing radiation

CALIBRATION
276 Radon calibration factor for charcoal canisters

279 Reply to 'Radon calibration factor for charcoal canisters'

507 A performance evaluation study of three types of α-track detector radon monitors

697 Calibration of α-track monitors for measurement of thoron (^{220}Rn)

CANCER
155 Surface to nuclear distances in human bronchial epithelium: relationships to penetration by Rn daughters

223 Summary: International Workshop on Residential Rn Epidemiology

281 Cancer dose-response in A-bomb survivors: erroneous basis of Izatt's 'fairly conclusive evidence' for hormesis

281 Response to 'Supra-linear dose-response in the A-bomb study'

457 A commentary on an association of malignant melanoma with nonultraviolet radiation exposure

489 Radon exposure, cigarette smoking, and other mining experience in the Beaverlodge uranium miners cohort

CARBON, ACTIVATED
695 Recycling activated carbon canisters used in indoor ^{222}Rn measurements

CARCINOGENESIS
353 Modifying effects of preexisting pulmonary fibrosis on biological responses of rats to inhaled $^{239}PuO_2$

CENTRAL NERVOUS SYSTEM

282 No evidence for microwave interaction with noradrenergic neurotransmitter systems

284 Reply to Klauenberg and Merritt

CESIUM

261 Influence of Prussian Blue in reducing transfer of radiocesium into ovine milk

539 Distribution of radiocesium in the soil-plant systems of upland areas of Europe

CESIUM-134

665 Radiocesium bioavailability: transfer of Chernobyl and tracer radiocesium to goat milk

CESIUM-137

1 The Goiânia radiation accident

3 Personal insights into the Goiânia radiation accident

5 The Goiânia accident: behind the scenes

7 The radiological accident in Goiânia: the initial remedial actions

17 Medical and related aspects of the Goiânia accident: an overview

25 Localized lesions induced by ^{137}Cs during the Goiânia accident

31 Clinical and hematological aspects of ^{137}Cs: the Goiânia radiation accident

41 Measurements of ^{137}Cs in blood from individuals exposed during the Goiânia accident

43 Application of in-vitro bioassay for ^{137}Cs during the emergency phase of the Goiânia accident

51 Design and operation of a whole-body monitoring system for the Goiânia radiation accident

57 Studies of Cs retention in the human body related to body parameters and Prussian Blue administration

63 Medical aspects of ^{137}Cs decorporation: the Goiânia radiological accident

67 The fate of chromosomal aberrations in ^{137}Cs-exposed individuals in the Goiânia radiation accident

CESIUM-137 (CONT.)

71 Novel biodosimetry methods applied to victims of the Goiânia accident

77 Guidance for selecting nuclear instrumentation derived from experience in the Goiânia accident

81 Radiological survey of Goiânia by a mobile monitoring unit

87 Considerations related to the decontamination of houses in Goiânia: limitations and implications

91 Distribution of ^{137}Cs in soils due to the Goiânia accident and decisions for remedial action during the recovery phase

99 Cesium-137 in the Goiânia waterways during and after the radiological accident

105 The Goiânia radiation accident: postaccident photographs

199 Assessment of radiocesium incorporation in Austrians after the Chernobyl accident

427 Chernobyl fallout in southern and central Finland

533 High radiocesium levels in granite outcrop vegetation and reductions through time

665 Radiocesium bioavailability: transfer of Chernobyl and tracer radiocesium to goat milk

789 Physical characterization of a ^{137}Cs field used for proficiency-test irradiations

863 Reply to Harley and Harley

863 Use of gummed-film fallout data

CHARCOAL CANISTERS

177 An improved ^{222}Rn canister using a two-stage charcoal system

276 Radon calibration factor for charcoal canisters

279 Reply to 'Radon calibration factor for charcoal canisters'

497 Comparative performance of short-term diffusion barrier charcoal canisters and long-term α-track monitors for indoor ^{222}Rn measurements

CHARCOAL FILTERS
237 Survey of indoor ^{222}Rn concentrations in Hong Kong

CHERNOBYL
199 Assessment of radiocesium incorporation in Austrians after the Chernobyl accident

203 Human postmortem thyroid ^{131}I content and risk estimates in Bratislava, Czechoslovakia following the Chernobyl accident

261 Influence of Prussian Blue in reducing transfer of radiocesium into ovine milk

427 Chernobyl fallout in southern and central Finland

462 Protection of the population in the event of a nuclear accident

517 Radioiodine retention in ovine thyroids in northwestern Greece following the reactor accident at Chernobyl

539 Distribution of radiocesium in the soil-plant systems of upland areas of Europe

569 Removal rates of Chernobyl fallout radioactivity on urban surfaces

575 Distribution of fallout radionuclides in soil, plants, and honey

665 Radiocesium bioavailability: transfer of Chernobyl and tracer radiocesium to goat milk

867 Power production: what are the risks?

CHROMOSOME ABERRATION
67 The fate of chromosomal aberrations in ^{137}Cs-exposed individuals in the Goiânia radiation accident

71 Novel biodosimetry methods applied to victims of the Goiânia accident

COMPUTER CALCULATIONS
243 Radon levels in United States homes by states and counties

581 ALDOSE: A computer code to calculate absorbed-dose rate, dose-equivalent rate, and dose-weighted LET as functions of depth in water irradiated by an α-particle disc source

COMPUTERS
285 QUEST, version 2.0

COMPUTERS (CONT.)

367 A method to automate radiological surveys: the ultrasonic ranging and data system

453 Data base management system for a radiation safety program

459 LINEDOSE, version 2.0

581 ALDOSE: A computer code to calculate absorbed-dose rate, dose-equivalent rate, and dose-weighted LET as functions of depth in water irradiated by an α-particle disc source

605 OMNIGAM, version 3.4 and MAESTRO II, version 1.2

681 Investigation of aerial dispersion of radioactive dust from an open-pit uranium mine by passive vinyl collectors

763 Computerized system for nuclear emergency response in the ENEA nuclear research center of Frascati

865 Manuscript Manager, version 1.2e

CONTAMINATION

365 Contamination and radiation exposure from ^{201}Tl in patients undergoing dialysis after a nuclear medicine study

CONTAMINATION, ENVIRONMENTAL

91 Distribution of ^{137}Cs in soils due to the Goiânia accident and decisions for remedial action during the recovery phase

99 Cesium-137 in the Goiânia waterways during and after the radiological accident

105 The Goiânia radiation accident: postaccident photographs

411 Calculation of effective dose-equivalent responses for external exposure from residual photon emitters in soil

427 Chernobyl fallout in southern and central Finland

533 High radiocesium levels in granite outcrop vegetation and reductions through time

569 Removal rates of Chernobyl fallout radioactivity on urban surfaces

609 Trashing the planet

859 Radioactivity in zirconium oxide powders used in industrial applications

CONTAMINATION, EXTERNAL
269 Performance characteristics of a commercial dedicated contamination counter

458 Phosphorus-32 skin decontamination

841 Hot particle self-absorption factor

CONTAMINATION, INTERNAL
307 U.S. Transuranium Registry report on the ^{239}Pu distribution in a human body

CORRECTION FACTORS
841 Hot particle self-absorption factor

CORRECTIONS
873 Correction for: Adsorption and desorption of noble gases on activated charcoal: II. ^{222}Rn studies in a monolayer and packed bed. Health Phys. 59: 393-404; 1990

COST-BENEFIT ANALYSIS
169 Regulatory control of indoor Rn

COUNTING EFFICIENCY
163 Radium-226 whole-body gamma counting and ^{222}Rn breath analysis: report on a subject exposed to uranium mill tailings

269 Performance characteristics of a commercial dedicated contamination counter

CURIUM
797 Gastrointestinal absorption of neptunium and curium in humans

CYTOGENETICS
S3 Current status of cytogenetic procedures to detect and quantify previous exposures to radiation: a summary

DECONTAMINATION
43 Application of in-vitro bioassay for ^{137}Cs during the emergency phase of the Goiânia accident

87 Considerations related to the decontamination of houses in Goiânia: limitations and implications

105 The Goiânia radiation accident: postaccident photographs

458 Phosphorus-32 skin decontamination

569 Removal rates of Chernobyl fallout radioactivity on urban surfaces

610 Residual radioactivity and recycling criteria

DECONTAMINATION (CONT.)
843 Implementation of a source term control program in a mature boiling water reactor

859 Radioactivity in zirconium oxide powders used in industrial applications

DECORPORATION
57 Studies of Cs retention in the human body related to body parameters and Prussian Blue administration

63 Medical aspects of ^{137}Cs decorporation: the Goiânia radiological accident

105 The Goiânia radiation accident: postaccident photographs

DETECTOR, ALPHA-TRACK
497 Comparative performance of short-term diffusion barrier charcoal canisters and long-term α-track monitors for indoor ^{222}Rn measurements

507 A performance evaluation study of three types of α-track detector radon monitors

DETECTOR, RADIATION
51 Design and operation of a whole-body monitoring system for the Goiânia radiation accident

367 A method to automate radiological surveys: the ultrasonic ranging and data system

781 An evaluation of radiation and dust hazards at a mineral sand processing plant

DETECTOR, SCINTILLATION
381 Theoretical response of a ZnS(Ag) scintillation detector to α-emitting sources and suggested applications

DIAGNOSTIC IMAGING
657 Assessment of ^{18}F gaseous releases during the production of ^{18}F-fluorodeoxyglucose

DIAGNOSTIC RADIOLOGY
661 Composite materials for x-ray protection

DIFFUSION
807 Multiphase radon generation and transport in porous materials

DOGS
435 Distribution of radium-induced bone cancers in beagles and comparison with humans

567 Rn:Ra ratios in bone of beagles injected with ^{226}Ra

DOSE
781 An evaluation of radiation and dust hazards at a mineral sand processing plant

DOSE, ABSORBED
287 Clinical neutron dosimetry part I: determination of absorbed dose in a patient treated by external beams of fast neutrons

581 ALDOSE: A computer code to calculate absorbed-dose rate, dose-equivalent rate, and dose-weighted LET as functions of depth in water irradiated by an α-particle disc source

709 Natural and artificial radionuclides on the northeast coast of Spain

841 Hot particle self-absorption factor

DOSE, EXTERNAL
265 Hand dose measurements in interventional radiology

RADON-222 (CONT.)
604 Radon leakage from liquid scintillation vials

631 Variation of radon levels in U.S. homes correlated with house characteristics, location, and socioeconomic factors

691 A radiological evaluation of phosphogypsum

697 Calibration of α-track monitors for measurement of thoron (^{220}Rn)

781 An evaluation of radiation and dust hazards at a mineral sand processing plant

807 Multiphase radon generation and transport in porous materials

817 Toward a standard method for determining waterborne radon

831 Occupational exposure to radon daughters in Mammoth Cave National Park

RADON-222, INDOOR
177 An improved ^{222}Rn canister using a two-stage charcoal system

189 Summertime elevation of ^{222}Rn levels in Huntsville, Alabama

243 Radon levels in United States homes by states and counties

393 Dynamics of Rn transport from the cellar to the living area in an unheated house

447 Assessment of the indoor Rn contribution of Swiss building materials

497 Comparative performance of short-term diffusion barrier charcoal canisters and long-term α-track monitors for indoor ^{222}Rn measurements

631 Variation of radon levels in U.S. homes correlated with house characteristics, location, and socioeconomic factors

695 Recycling activated carbon canisters used in indoor ^{222}Rn measurements

RECYCLING
695 Recycling activated carbon canisters used in indoor ^{222}Rn measurements

REFERENCE MAN
139 Suggested reference values for regional blood volumes in humans

733 On the boundary between ionizing and nonionizing radiation

REGIONAL BLOOD VOLUMES
139 Suggested reference values for regional blood volumes in humans

REGULATIONS
169 Regulatory control of indoor Rn

609 Safety series 102, recommendations for the safe use and regulation of radiation sources in industry, medicine, research and teaching

610 Biological radiation effects

721 Compliance testing of reusable containers for transport of type A packages of radioactive material

725 Establishment of radiation protection boundaries for nuclear power plants

733 On the boundary between ionizing and nonionizing radiation

RELATIVE BIOLOGICAL EFFECTIVENESS
717 RBE vs. dose for low doses of high-LET radiations

REVIEWS
285 QUEST, version 2.0

287 Clinical neutron dosimetry part I: determination of absorbed dose in a patient treated by external beams of fast neutrons

287 Radiation protection

288 Radiation and radioactivity on earth and beyond

459 LINEDOSE, version 2.0

461 Low-level radioactive waste: from cradle to grave

461 Understanding in-flight radiation: a reference manual

462 Protection of the population in the event of a nuclear accident

605 OMNIGAM, version 3.4 and MAESTRO II, version 1.2

REVIEWS (CONT.)

609 Safety series 102, recommendations for the safe use and regulation of radiation sources in industry, medicine, research and teaching

609 Trashing the planet

610 Biological radiation effects

610 Coping with radiation accidents: hospital and community planning

610 Residual radioactivity and recycling criteria

611 Radiation biophysics

734 Compendium of neutron spectra and detector responses for radiation protection purposes

865 Manuscript Manager, version 1.2e

867 Power production: what are the risks?

867 Radiation oncology: radiobiological and physiological perspectives

868 An environmental odyssey

868 Biochemistry of ionizing radiation

RISK ANALYSIS

203 Human postmortem thyroid ^{131}I content and risk estimates in Bratislava, Czechoslovakia following the Chernobyl accident

713 A proposed biophysical framework for radiation protection calculations using summation of iso-risk contributions of different radiations

SCREENING MEASUREMENTS

189 Summertime elevation of ^{222}Rn levels in Huntsville, Alabama

SHIELDING

209 Thermalization of accelerator-produced neutrons in a concrete room

587 Depth distribution of residual radioactivities in the concrete wall of an electron linac facility

SKELETON

307 U.S. Transuranium Registry report on the ^{239}Pu distribution in a human body

SKELETON (CONT.)

343 Radionuclide distribution dynamics in skeletons of beagles fed ^{90}Sr: correlation with injected ^{226}Ra and ^{239}Pu

435 Distribution of radium-induced bone cancers in beagles and comparison with humans

567 Rn:Ra ratios in bone of beagles injected with ^{226}Ra

SMOKING

489 Radon exposure, cigarette smoking, and other mining experience in the Beaverlodge uranium miners cohort

SOFTWARE REVIEWS

285 QUEST, version 2.0

459 LINEDOSE, version 2.0

605 OMNIGAM, version 3.4 and MAESTRO II, version 1.2

865 Manuscript Manager, version 1.2e

SOIL

91 Distribution of ^{137}Cs in soils due to the Goiânia accident and decisions for remedial action during the recovery phase

189 Summertime elevation of ^{222}Rn levels in Huntsville, Alabama

393 Dynamics of Rn transport from the cellar to the living area in an unheated house

411 Calculation of effective dose-equivalent responses for external exposure from residual photon emitters in soil

523 A validation test of a model for long-term retention of ^{129}I in surface soils

539 Distribution of radiocesium in the soil-plant systems of upland areas of Europe

575 Distribution of fallout radionuclides in soil, plants, and honey

643 Food-chain and dose model, CALDOS, for assessing Canada's nuclear fuel waste management concept

773 Formation rate of nonexchangeable organically bound tritium from tritiated soil water

807 Multiphase radon generation and transport in porous materials

SPECTROMETRY, NEUTRON
703 Using the BD-100R® as a neutron spectrometer through applied pressure variation

STRONTIUM-90
343 Radionuclide distribution dynamics in skeletons of beagles fed ^{90}Sr: correlation with injected ^{226}Ra and ^{239}Pu

SURVEYS
367 A method to automate radiological surveys: the ultrasonic ranging and data system

593 Radiological assessment program for a broadscope by-product materials licensee

SURVIVORS, ATOMIC BOMB
281 Cancer dose-response in A-bomb survivors: erroneous basis of Izatt's 'fairly conclusive evidence' for hormesis

TAILINGS
163 Radium-226 whole-body gamma counting and ^{222}Rn breath analysis: report on a subject exposed to uranium mill tailings

399 Abandoned Rayrock uranium mill tailings in the Northwest territories: environmental conditions and radiological impact

TARGET FRAGMENTATION
559 Analytical relationships of nuclear field and microdosimetric quantities for target fragmentation in tissue systems

THALLIUM-201
365 Contamination and radiation exposure from ^{201}Tl in patients undergoing dialysis after a nuclear medicine study

THERMOLUMINESCENCE
265 Hand dose measurements in interventional radiology

579 Actinic region dosimetry

THORIUM-232
859 Radioactivity in zirconium oxide powders used in industrial applications

THORON
697 Calibration of α-track monitors for measurement of thoron (^{220}Rn)

THYROID
203 Human postmortem thyroid ^{131}I content and risk estimates in Bratislava, Czechoslovakia following the Chernobyl accident

517 Radioiodine retention in ovine thyroids in northwestern Greece following the reactor accident at Chernobyl

837 Case studies involving ^{125}I thyroid uptake following unblocking

TRANSPORT, ENVIRONMENTAL
261 Influence of Prussian Blue in reducing transfer of radiocesium into ovine milk

399 Abandoned Rayrock uranium mill tailings in the Northwest territories: environmental conditions and radiological impact

517 Radioiodine retention in ovine thyroids in northwestern Greece following the reactor accident at Chernobyl

643 Food-chain and dose model, CALDOS, for assessing Canada's nuclear fuel waste management concept

773 Formation rate of nonexchangeable organically bound tritium from tritiated soil water

TRANSPORTATION
721 Compliance testing of reusable containers for transport of type A packages of radioactive material

TRITIUM
773 Formation rate of nonexchangeable organically bound tritium from tritiated soil water

TUMORS
457 A commentary on an association of malignant melanoma with nonultraviolet radiation exposure

ULTRAVIOLET RADIATION
457 A commentary on an association of malignant melanoma with nonultraviolet radiation exposure

579 Actinic region dosimetry

UPTAKE, PLANT
539 Distribution of radiocesium in the soil-plant systems of upland areas of Europe

575 Distribution of fallout radionuclides in soil, plants, and honey

UPTAKE, PLANT (CONT.)
675 Biological half-life of gaseous elemental iodine deposited onto rice grains

URANIUM
155 Surface to nuclear distances in human bronchial epithelium: relationships to penetration by Rn daughters

163 Radium-226 whole-body gamma counting and ^{222}Rn breath analysis: report on a subject exposed to uranium mill tailings

237 Survey of indoor ^{222}Rn concentrations in Hong Kong

275 Radon-220 progeny measurements

275 Reply to Bigu

335 Modified biokinetic model for uranium from analysis of acute exposure to UF_6

399 Abandoned Rayrock uranium mill tailings in the Northwest territories: environmental conditions and radiological impact

691 A radiological evaluation of phosphogypsum

URANIUM-235
719 Radiological significance of ^{227}Ac and ^{231}Pa

URANIUM-238
681 Investigation of aerial dispersion of radioactive dust from an open-pit uranium mine by passive vinyl collectors

859 Radioactivity in zirconium oxide powders used in industrial applications

URANIUM MINES
489 Radon exposure, cigarette smoking, and other mining experience in the Beaverlodge uranium miners cohort

WASTE, LOW-LEVEL
461 Low-level radioactive waste: from cradle to grave

WASTE DISPOSAL
91 Distribution of ^{137}Cs in soils due to the Goiânia accident and decisions for remedial action during the recovery phase

105 The Goiânia radiation accident: postaccident photographs

163 Radium-226 whole-body gamma counting and ^{222}Rn breath analysis: report on a subject exposed to uranium mill tailings

WASTE DISPOSAL (CONT.)
399 Abandoned Rayrock uranium mill tailings in the Northwest territories: environmental conditions and radiological impact

453 Data base management system for a radiation safety program

609 Trashing the planet

610 Residual radioactivity and recycling criteria

843 Implementation of a source term control program in a mature boiling water reactor

WASTE MANAGEMENT
453 Data base management system for a radiation safety program

461 Low-level radioactive waste: from cradle to grave

643 Food-chain and dose model, CALDOS, for assessing Canada's nuclear fuel waste management concept

WATER
817 Toward a standard method for determining waterborne radon

WATER, GROUND
229 Radon concentrations in ground water of the Georgia Piedmont

773 Formation rate of nonexchangeable organically bound tritium from tritiated soil water

WEAPONS
S1 Assessment of techniques to determine previous radiation exposures (emphasizing exposures occurring decades earlier): introduction and summary

S3 Current status of cytogenetic procedures to detect and quantify previous exposures to radiation: a summary

S7 Current status of whole-body counting as a means to detect and quantify previous exposures to radioactive materials

S45 Current status of bioassay procedures to detect and quantify previous exposures to radioactive materials

S103 Current status of biological indicators to detect and quantify previous exposures to radiation

WHOLE-BODY COUNTING

S7 Current status of whole-body counting as a means to detect and quantify previous exposures to radioactive materials

51 Design and operation of a whole-body monitoring system for the Goiânia radiation accident

199 Assessment of radiocesium incorporation in Austrians after the Chernobyl accident

X-RAY IMAGING

661 Composite materials for x-ray protection
